

# Quantifying the Quality of Evolutionary Data from the Fossil Record

This talk will provide an overview of some of the major challenges facing evolutionary analysis of the record and progress being made by taphonomic analysis, both of the stratigraphic record itself and in analogous modern systems.

**Susan Kidwell,**  
Department of  
Geophysical Sciences, University of Chicago

**Wednesday, February 22, 3:30 PM**  
**Tech LR 4**

**2145 Sheridan Road, Evanston Campus**

**A Life Sciences Seminar**

**Presented by the Interdisciplinary Committee on Evolutionary Processes (ICEP)**
